

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A laminate having a layer (A) comprising a fluoro-resin and a layer (B) comprising a fluorine-free organic material, wherein said laminate has a fuel permeation rate of not higher than  $1.5 \text{ g/m}^2/\text{day}$ , the polymer constituting the fluoro-resin is a chlorotrifluoroethylene copolymer comprising chlorotrifluoroethylene and at least one of ethylene and a fluorine-containing monomer.
2. (original): The laminate according to Claim 1, wherein the fluoro-resin comprises a fluoro-resin (a) having a fuel permeation coefficient of not higher than  $1 \text{ g}\cdot\text{mm/m}^2/\text{day}$ .
3. (original): The laminate according to Claim 2, wherein the fluoro-resin (a) comprises a fluoro-resin (a1) having a fuel permeation coefficient of not higher than  $0.3 \text{ g}\cdot\text{mm/m}^2/\text{day}$ .
4. (canceled).
5. (canceled).
6. (currently amended): The laminate according to ~~Claim 3~~ Claim 1, wherein a polymer constituting the fluoro-resin (a1) is a chlorotrifluoroethylene copolymer comprising chlorotrifluoroethylene units, tetrafluoroethylene units and monomer [A] units derived from monomers [A] copolymerizable with chlorotrifluoroethylene and tetrafluoroethylene, said chlorotrifluoroethylene unit and said tetrafluoroethylene unit amounting to 90 to 99.9 mole percent in total, said monomer [A] unit amounting to 10 to 0.1 mole percent.

7. (previously presented): The laminate according to Claim 1, wherein the fluorine-free organic material comprises a polyamide-based resin and/or a polyolefin-based resin.

8. (previously presented): The laminate according to Claim 1, which is a laminate for a fuel tube, wherein said layer (A) is the fuel tube innermost layer.
